Objective

Fullstack web developer (70% FE, 30% BE) with startup experience collaboratively releasing code servicing millions of users.

Skills

React * Redux * MobX * Apollo * GraphQL * Typescript * Next.js * Node * Express * Jest * React Testing Library
Storybook * Git * Agile * Scrum * Jira * Figma

Professional Experience

Stealth Startup | Senior Software Engineer   2023 - present

Artica | artica.com | Senior Software Engineer   2022
- ➢ Worked closely with multiple teams to release a brand new website in 6 weeks from the ground up
- ➢ Implemented an internal feature that increased Google Ad Campaigns Creation from 1/hr to 1/15 min
- ➢ Collaborated closely with design to offer smooth and impressive UX solutions to present to users

Dutchie | dutchie.com | Senior Software Engineer   2020 - 2022
- ➢ Built and released consumer facing dispensary menu responsible for over 90% of traffic
- ➢ Rebuilt and released Dutchie branded e-commerce menu with a focus on responsive UX
- ➢ Lead greenfield FE project, integrating with ACH payment partners and introducing new, frictionless payments
- ➢ Worked closely with PMs and designers to create delightful user workflows using React/TypeScript/Next.js
- ➢ Introduced LogRocket used by enterprise to debug and monitor user conversion rates
- ➢ Implemented first service using a gRPC directive within the Node/GraphQL framework
- ➢ Ensure user data security and privacy, adhering to HIPAA and state-by-state guidelines

Remine Inc. | remine.com | Software Engineer   2018 - 2020
- ➢ Authored and owned the React Native mobile saved searches workflow with mobile team
- ➢ Built out the mobile social inviter that accessed users' phone books to send out invitations to the platform
- ➢ Created the backend server APIs using Node and GraphQL, interfacing with the Elasticsearch DB
- ➢ Overhauled and owned the consumer property map, boosting UX and performance by greater than 100%

Phunware Inc. | phunware.com | Software Engineer   2017 - 2018
- ➢ Enhanced and rebuilt modules from a legacy PHP codebase with cutting edge libraries to boost development pace
- ➢ Collaborated across multiple distributed teams (product, design, server, etc.) to streamline sprint execution
- ➢ Rewrote the Mapping module in React and Apollo/GraphQL with caching to improve UX and performance by 50%
- ➢ Benchmarked an 80% minimum unit test coverage with Jest to prevent bugs and regressions

Industry Careers, Inc. | industry.co | Fullstack Developer   2016- 2017
- ➢ Rebuilt the Industry app from the ground up as a main full-stack developer using modern Javascript technologies
- ➢ Restructured server code to reflect a more efficient and streamlined user profile creation process

Education

Hack Reactor - Advanced Software Immersive Program   2016
Grand Valley State University - BA in Finance and International Business   2009
