Professional Experience

Ninjabrader | ninjabrader.com | Senior Software Engineer

Dec 24 - present

- Drove team-wide adoption of AI engineering workflows, standardizing Claude for coding tasks and autonomous test automation across departments.
- Led the transition to the Web Trader Refresh project, architecting the platform's open beta launch infrastructure using Statsig feature gates, environment configurations, and modular access wrappers
- Owned the full lifecycle delivery of core UI components for the internal Strata design system utilizing React, Shadcn, and Storybook, while contributing upstream reusable primitives
- Established as a key engineer on the Trader Engagement rebuild, architecting its technical foundation and owning end-to-end delivery of several of its highest-traffic features: Performance Center, Settings, and Statements/Transfers

M1 Finance | m1.com | Senior Software Engineer

Jan 23 - Oct 24

- Spearheaded personal loan flow rebuild using React, reducing friction, improving user flow and conversions by 25%
- Drove multiple project releases, resulting in a 20% increase in user engagement by prioritizing impactful features
- Mentored and led junior developers to build good coding habits, strengthen self-reliance in a scrappy environment
- Implemented WCAG-compliant accessibility features, ensuring inclusive design and reaching a wider audience
- Deployed a high-performance web application using Next.js, leveraging built-in SEO optimizations and server-side rendering to increase organic traffic by 25%, improving search engine visibility and attracting prospective users
- Established automated testing pipelines, which reduced bugs in production by 30% and improved product reliability

Artica | artica.com | Senior Software Engineer

Aug 22 - Nov 22

- Led cross-functional launch of a new website in 6 weeks, delivering a seamless shopping AI assistant user interface
- Developed a Google Ad feature that cut ad creation time by 400%, saving over 100 man-hours per month

Dutchie | dutchie.com | Senior Software Engineer

Apr 20 - Jul 22

- Delivered a redesigned app, leading to a 15% uplift in sales through an optimized, mobile-responsive interface
- Led greenfield FE project, integrated an ACH payments service that became the largest revenue stream
- Introduced LogRocket user journey, improved conversion rates by 10% through data-driven UI optimizations
- Integrated gRPC service in Node.js, enhancing system communication efficiency and cutting response times by 20%

Remine Inc. | remine.com | Software Engineer

Apr 18 - Mar 20

- Authored React Native mobile saved searches, working within the mobile team to ensure seamless UX
- Optimized the property map, improving load times by 100% and resulting in a 50% improvement in user retention

Phunware Inc. | phunware.com | Software Engineer

Feb 17 - Feb 18

- Modernized legacy PHP modules using cutting-edge libraries, greatly accelerating overall development speed

Industry Careers, Inc. | industry.co | Fullstack Developer

Oct 16- Jan 17

- Rebuilt the Industry app from the ground up as lead full-stack developer, utilizing modern JavaScript technologies
-

Education

Hack Reactor - Advanced Software Immersive Program

Grand Valley State University - BA in Finance and International Business
